Carried Away

Icon For Hire

Once again
I lie awake at night in storyland
I'm slippin' away, understand
Just to escape I run to hope
Still light years away
I'm sinking in the sand
I'm gonna take your hand
You gotta understand
I'm carried away, your eternal flame
Don't blow it out, you gotta leave it on
I'm carried away, I'm finding my faith
Goes on and on, I'm really getting a carried away
Never fall
Into the world of someone calling out
A mirror inside
Is telling' me you're just a breath away from doubt
And you wake in the night
I'm sinking in the sand
I'm gonna take your hand
You gotta understand
I'm carried away, your eternal flame
Don't blow it out, you gotta leave it on
I'm carried away, I'm finding my faith
Goes on and on, I'm really getting a carried away
'Cause I can go on this time
In my way
'Cause I believe all my prayers
I'm carried away, your eternal flame
Don't blow it out, you gotta leave it on
I'm carried away, I'm finding my faith
Goes on and on, I'm really getting a carried away
I'm carried away, your eternal flame
Don't blow it out, you gotta leave it on
I'm carried away, I'm finding my faith
Goes on and on, I'm really getting a carried away
