Stop Me

Light Up The Sky

Stop me, don't pull me under
Because I don't wanna be the one left behind...no way
And if you pull me down, down with you
I will never ever be the same...no wayI gave my heart, you stole it away
I let you in, you didn't stay
I left the light on for you
Up all night but this ain't no romanceI can't believe I stuck around
Oh how could you resist this
Her eyes wide, lips are tense now
Finger on the trigger, aim and fireThat bullet tore right through my life
Baby...this blood stain mismatches your dress tonightStop me, don't pull me under
Because I don't wanna be the one left behind...no way
And if you pull me down, down with you
I will never ever be the same...no wayYou cause a lot of trouble
The thought of you gone I cannot bear
But I know I shouldn't wallow
The future's passed, we couldn't last on more day..no
We wouldn't last another day...noWhat is love, but our hearts
Burning brighter than a million stars
When it dies will you let it fade
Or search the universe for that love again
Love againStop me, don't pull me under
Because I don't wanna be the one left behind...no way
And if you pull me down, down with you
I will never ever be the same...no wayYou cause a lot of trouble
The thought of you gone I cannot bear
But I know I shouldn't wallow
The future's passed, we couldn't last one more day...no
We wouldn't last another day...no
But who could ever know
