

# Last December

## AlterEgo

The howling winds blow  
On this moonlit night  
Eyes locked in fear  
With a dark embraceThe bitter cold winds  
Freeze the tears that fall  
Hands held in grace  
As we take the final stepObsessed with our love  
Here is our fate  
To need the final call  
On this special winter dayA message to our elders  
They surely won't forget  
Our love must last forever  
In death we shall not partIt seems like only yesterday  
Our lives together planned  
They say it's just a passing phase  
We're damned by our youthWhy does no one understand  
What we have is real  
This is not your average love it's foreverLast December  
Mother you have forced us here  
Last DecemberFather now we'll disappear  
Last December  
One last step we fade awaySo we take the final step  
Heed the final call  
Together we are strong  
Divided we must fallTeenage suicide  
Our only way out  
Together we might live  
Divided we must fallLast December  
Mother you have forced us here  
Last DecemberFather now we'll disappear  
Last December  
One last step we fade away
