Leo

Stemage

Take the light, take the light
Take all you need to
I never know, never cared too much
When you see it it goes
Your sheltered arms give me
All the warmth I need to know and
And all the light I need to know in another room
Read the sign
See the time
It begins to unwind
Your morning still moon shines so bright
I am in awe of you
And you're calm
All I write about is all I know or feel
And how to say it real
And to make it clear too
See me, see me
See me, see me
Take the sign
Take the time
It begins to unwind
Your morning still moon shines so bright
I am in awe of you
And you're calm
All I write about is all I know or feel
And how to say it real
And to make it clear too
See me, see me
See me, see me
Take the time
Take the sign
It begins to unwind
Your morning still moon shines so bright
I am in awe of you
