

Hyde

[Astrid S](#)

He's asleep, brighter day, living life
We never did it before
And where he goes, I can tell no one knows
No one knows
He's got this look in his eyes
Now I don't know Hyde, hyde, hyde When he's done, text me in the night
Where you're gone
He's the one, text me in the night
When you leave, he's right there
Quenches thirst without a care Hyde, hyde, hyde It's not like I remember it
Nothing at all
Makes him satisfied oh, I can't
Keep him away, when it's cold at night
And he just took my name it threw it right into the wall
Now I'm not allowed to know about what he can live without But if you understood all the words I'm too afraid
to say out loud
But it's like living life, poison through these veins
He gets this look in his eyes, now i don't know Hyde, hyde, hyde When he's done, text me in the night
Where you're gone
He's the one, text me in the night
When you leave, he's right there
Quenches thirst without a care Hyde, hyde, hyde
