Before It Explodes

Charice

It's not a question of love
'Cause our love has never changed
But all the little things keep piling up
And life keeps getting in the way
[Chorus:]Don't make it harder than it is
We both knew it'd come to this
Better now than in a year
More nights of tears and we both hate each other
The fuse is already lit, so how about a final kiss
And just let it go?
And stop the madness before it explodes
Before it's out of our control
Let's stop the madness before it explodes
We gotta let it go
Before it all explodes
[Bruno Mars]Somethings we won't understand
And we're both so tired of being misunderstood

So let's just turn around and walk away
And hold on to what was good
[Chorus (Charice & Bruno Mars)]There ain't nothing that can save us
But you're close to the edge
And what's the use of going on,
If we're lying to each other
Every word that is said
Its too late for us now
Cause we can hear the count down
Its getting close, its gonna blow
And stop the madness before it explodes
Before it's out of our control
Let's stop the madness before it explodes
We gotta let it go
Before it all explodes
We gotta stop the madness
