Little By Little

Whitney Duncan

Rome wasn't built in a day
It didn't happen overnight
The stars didn't get to shine that way
Just by turnin' on the lightsAnd I'm not any different
God knows I'm notYeah, I just need a little more time
To pick up the pieces so I
Can put it back together, baby
It could take forever but I will, I willLittle by little, little by littleIt's best for you to walk away
I can't look you in the eye
'Cause I can't be the woman
That you need me to be tonightI wish it was that simple
But God knows it's notYeah, I, I just need a little more time
To pick up the pieces so I
Can put it back together, baby
It could take forever but I will, I willLittle by little, brick by brick
Little by little, bit by bit
I'm getting better the closer I get
Little by little by little, yeahYeah, I, I just need a little more time
To pick up the pieces so I
Can put it back together, baby
It could take forever but I will, I willLittle by little, little by little
Little by little, I'll get there
Little by little by little, yeah
