

12=3 (Here Come the Doctors)

Ima Robot

12=3

A line wrapped around a string
Girls in the classroom
Concentrate, boy A line around gravity
Spiritual individual
Corrosion and humanity
The mathematics of love and the science of sanity Living it up in the atmosphere
Nobody dies if the heart is here Kiss me goodbye
For the doctors are comin'
We all know why
Because I wasn't born Here we go again
As time passes by here
We don't live and lie here
We're all going to die in the end Standin' on the corner
Holes in my shirt
Girls drivin' by
Oh come here, don't flirt 'Cause she's never had a girlfriend
And I don't want one either
And I don't want the people
Knowin' that I was smoking ether I've been thinking about science
In my spare time
I've been thinking about the reason
To the rhyme, heck, yeah Livin' it up in the atmosphere
Nobody dies if the heart is here Kiss me goodbye
For the doctors are comin'
We all know why
Because I wasn't born Here we go again
As time passes by here
We don't live and lie here
We're all going to die in the end Kiss me goodbye
For the doctors are comin'
We all know why
Because I wasn't born Here we go again
As time passes by here
We don't live and lie here
We're all going to die in the end Rock science
And people talk, talk science
And people see stars sometimes
And some people raise cadavers But not me, I see

The sun is made of string
Lights out from the underworld
People talk about God Are they insane? I don't think so
I say they're maybe spreading some love
Spreading it around and it feels good
In your skin
