12=3 (Here Come the Doctors)

Ima Robot

12 = 3

A line wrapped around a string

Girls in the classroom

Concentrate, boyA line around gravity

Spiritual individual

Corrosion and humanity

The mathematics of love and the science of sanityLiving it up in the atmosphere

Nobody dies if the heart is hereKiss me goodbye

For the doctors are comin'

We all know why

Because I wasn't bornHere we go again

As time passes by here

We don't live and lie here

We're all going to die in the endStandin' on the corner

Holes in my shirt

Girls drivin' by

Oh come here, don't flirt'Cause she's never had a girlfriend

And I don't want one either

And I don't want the people

Knowin' that I was smoking etherI've been thinking about science

In my spare time

I've been thinking about the reason

To the rhyme, heck, yeahLivin' it up in the atmosphere

Nobody dies if the heart is hereKiss me goodbye

For the doctors are comin'

We all know why

Because I wasn't bornHere we go again

As time passes by here

We don't live and lie here

We're all going to die in the endKiss me goodbye

For the doctors are comin'

We all know why

Because I wasn't bornHere we go again

As time passes by here

We don't live and lie here

We're all going to die in the endRock science

And people talk, talk science

And people see stars sometimes

And some people raise cadaversBut not me, I see

The sun is made of string
Lights out from the underworld
People talk about GodAre they insane? I don't think so
I say they're maybe spreading some love
Spreading it around and it feels good
In your skin
