

Ice

Gold Fields

(Verse)

The sun in my eyes feels like I wanna catch it
Around thermal eyes got me talking backwards.
I never take advice coming from the strange men
A battle onto wise, were drinking from the same can
But nothings cooler than ice. The wee under my path has got me on the right track
The sky turns to black, the sun wont try to fight back.
I never make advance, your hand is in my hand.
Head back to dry land, were dripping on the cool sand,
But nothings cooler than ice. The sun in my eyes, the wind in my back
This could be your last time,
Just come and lay down.
The sun in my eyes, the wind in my back
This could be your last time,
Just come and lay down.
The sun in my eyes, the wind in my back
This could be your last time,
Just come and lay down. Nothings cooler than ice.
