

Bad Times

Annie

Bad times
Never sounded so good
Even though I know we're no good
I forget about the pain You're damn right
We've been on and off for too long
Even though I know it's so wrong
Still I feel the same Bad times
Never sounded so good
Even though I know we're no good
I forget about the pain You're damn right
We've been on and off for too long
Even though I know it's so wrong
Still I feel the same The loneliness reminds you
That everything fades
You said that life is strange With all the mess behind you
It's better that way
You said our love could change To have you in my arms
When all is said and done
To have you in my arms
Make believe we've just begun Bad times... Bad times
Never sounded so good
Even though I know we're no good
I forget about the pain You're damn right
We've been on and off for too long
Even though I know it's so wrong
Still I feel the same The loneliness reminds you
That everything fades
You said that life is strange With all the mess behind you
It's better that way
You said our love could change Bad times...
