

# I Want to Grow Old With You

**Donna Ulisse**

Years from now what I see hand in hand is you and me  
Laughin' and lovin' our whole lives through.  
We'll share our joys and our fears through the triumphs and the tears  
I want to grow old with you.

And as the days tumble past we'll make every moment last  
Change is something with a reason, too.  
Those little lines on your face grow more beautiful each day  
I want to grow old with you.

There's a Higher Power who's always known  
That we weren't meant to go through life alone  
I don't believe the sun would rise if I could not see it in your eyes  
Without you I don't know what I'd do.  
So take good care of your health  
Please don't leave me by myself.  
I want to grow old with you.

There's a Higher Power who's always known  
That we weren't meant to go through life alone  
I don't believe the sun would rise if I could not see it in your eyes  
Without you I don't know what I'd do.  
So take good care of your health  
Please don't leave me by myself.  
I want to grow old with you.  
Oh, I want to grow old with you.
