Animal

Subhumans

Ever since they put you away
Things haven t been quite the same
They cut off all your lovely hair
And gave you a brand new brain
Sent you to university
'Cos that was the next step up
Studying sociology
They gave you a plastic cupWhat happened to you with your brand new brain?
What will they do if they get you again?
Animal! Coming to get you!
Animal! Cos you went insane!Your new brain was working really well
And they were satisfied
They thought they'd done a miracle
But you had something to hide
They left a bit of your old brain
Stuck inside your skull
That bit screwed up your culture
You became an animalOne night you were drinking
In the student bar
Two pints blew your animal mind
Your brain just went too far
The laughter turned to slaughter
You took all you could get
Now you sit alone in a disco
Smoking cigarettes
