Wasteland

Institute

They got aeroplanes flying over you
You cannot escape, see them watching you
Be paranoid, they have lists
Walls are listening, they know what you did
Love is stronger than hate, we are always on planes
Find mad love in a wasteland, find space in everything you can
Find mad love in a wasteland, find space, find space
Taste the happiness while she's hanging out with you
From the shadows life comes through
Be ready then, it could be anytime
If they come for you let them see you shine
Love is stronger than hate, we are always on planes
Find mad love in a wasteland, find space in everything you can
Find mad love in a wasteland, find space in everything you can
In everything you can
Got to find my way out of the wasteland
Move as fast as I can, find my way out of the wasteland
They got aeroplanes flying over you
You cannot escape, you cannot escape, you cannot escape
Find mad love in a wasteland, find space in everything you can
Find mad love in a wasteland, find space, find space
In everything you can, in everything you can
Got to find my way out the wasteland
Find my way out the wasteland
