

The Sleepwalk

The Telescopes

Don't take a walk down where the beaches are frozen
Bleach out the white across the thin ice for a moment
Don't step on water
Don't wanna be following alone again
I will share your sleepwalk
Slip out across the fields oh just walk through the rushes
Touch your way through paper mills through every thing life touches
Don't step off bridges
Don't wanna be following alone again
I will share your sleepwalk
Oh need these arms to keep you safe to keep you fragile
Swirling and celestial little daydream floats away now
She'll float forever
And I will be following alone again
I will share your sleepwalk
Sleepwalk
