Plastic

Spiderbait

I can see that look you get in your eyes
When anything's enough just to get you going
You're so tired of the same old places
And the same old facesIs that really where you want to be?
But you got something that you can rely on
'Cause everybody else is up your ass or
A shoulder for you to cry onBut I know, you can get far away
And do whatever you want to
But you never get ready
'Cause there's no time today
Yeah yeah yeahWhen you get that look you get in your eyes
You feel a little sick 'cause you're not together
But you just smile and think about
How you'll be round here foreverNobody wants another point of view
And that's so much here that you can rely on
'Cause everybody else is there for you with
A barbeque for you to fry onBut I know, you can get far away
And do whatever you want to
But you won't get ready
'Cause there's no time today
Yeah yeah yeahBut I know, you can get far away
And do whatever you want to
But you never get ready
'Cause there's no time today
Yeah yeah yeahI can see you're ready to go
