

# If I Could Fly

## Oceanlab

A thousand people on the street  
The rain is trying to drown my feet  
The cold bites into every bone

The solemn faces pass me by  
The grave near on buried smiles  
A crowded train to take me home

If I close my eyes a minute  
See a world within a minute  
Standing on the road  
My wings to take me high

If I could fly  
See the world beneath me  
Feel as though I'm set free  
Oh, if I could fly

A simple smile can change a day  
An understanding look can say  
I know exactly how u feel

But we have learned to build our walls  
So very strong and very tall  
For fear of what the world might steal

If I close my eyes a minute  
See a world within a minute  
Standing on the road  
My wings to take me high

If I could fly  
See the world beneath me  
Feel as though I'm set free  
Oh, if I could fly

If I could fly  
See the world beneath me  
Feel as though I'm set free  
Oh, If I could fly
