Across the World

THESET

Its strange how
Between each of your words
I can hear that its raining all across the world
From our windows underwater
I can watch the dark swimming all across the worldWhen you fall to sleep
Do you come apart
Do you think of me
Or do you just float face down
And listen to it raining all across the worldDo you notice
How at 4 A.M.
You can hear sounds that echo all across the world
You wrap your fingers around the cold air
Feels like memories of our lives spread all across the worldWhen you fall to sleep
Do you come apart
Do you think of me
Or do you just float face down
And listen to it raining all across the world
Its raining all across the world
