

Live Wire

Beastie Boys

I know where you got to be going but you don't know why
I see things I ought not to know but I can't help life
You never knew my heart for you was monster size You're a live wire
You're a live wire Let me know when you wanna check out for the all time high
My man told me long hellos and short good byes
But you are something else, I love you, please don't die You're a live wire
You're a live wire
