

# Get Off On the Pain

Gary Allan

I don't know why I love women  
That love to do me wrong  
I don't know why my life sounds like  
A heart-broke country songI ain't really happy  
Unless the sky starts driving rain  
Maybe I just get off on the painMy whole life I been picking fights  
There ain't no way to win  
There's a hundred scars and shoulda-run-aways  
Now tattooed on my skinThere's a side of me that just won't stop  
Dancin' in the flame  
Maybe I just get off on the pain'Cause I love the long shots  
And the left out lost causes  
Hanging out in the back of the pack  
With the dark horsesI ride the wrong road just as fast as I can  
God knows there's no one else to blame  
Sometimes I think I get off on the painI wake up every morning  
A thousand miles from home  
Praying for forgiveness  
For this aching in my bonesIt would be so easy  
To find a better way  
Oh, but I know I'll never change'Cause I love the long shots  
And the left out lost causes  
Hanging out in the back of the pack  
With the dark horsesI ride the wrong road just as fast as I can  
God knows there's no one else to blame  
Sometimes I think I get off on the pain'Cause I love the long shots  
And the left out lost causes  
Hanging out in the back of the pack  
With the dark horsesI ride the wrong road just as fast as I can  
God knows there's no one else to blame  
I know I'm the only one to blame  
Sometimes I think I get off on the pain  
Get off on the pain
