

# Dead End Street

## Blood for Blood

The sign in the road says we're going nowhere. I been running down a dead end street.  
I wanna rip through all the faces of the fools I see.  
And I know I'll never get away  
'cause the gutter taught me early that there ain't no better days for me.  
I guess my childhood broke my heart.  
Down in the projects you learn pain from the start.  
That's where I learned to hate the world,  
Just another lost soul praying to the night sky alone... Can someone, someone please tell me where I went wrong?  
And how many more times will I have to sing this same old song?  
Can you tell me, tell me please, tell me where I went wrong?  
And how many more times will I have to sing this same old sad, sad fucking song? I done my time on the city  
streets.  
Y'know that corner took a piece of me and my heart  
And made me an enemy of the world.  
Just another lost soul praying to the night sky alone.
