

Four Eyes

Matt Pond PA

Outside in the blast of yellow light
We let go of how we learned to hide
You can see everything, alright
Go on and take it in, four eyes
Now I know beyond the words you write
Now I know the stares that lead inside
You can see everything, alright
Go on and take it in, four eyes
Let's go further still
Than we've ever gone
Let's go far beyond
What we've ever known
You feel like you came up from the underground
Say hello for the first time to the sun and sound
It's been so long since you've said what you meant
It's been so long since you've been anything
Let's go further still
Than we've ever gone
Let's go far beyond
What we've ever known
You can see everything, alright
Go on and take it in, four eyes
Drag your claws from the underground
And try to grab a hold of the sun and sound
Come up with empty fistfuls
It's been such a long ride
You can see everything, alright
Go on and take it in, four eyes
Outside in the blast of yellow light
We let go of how we learned to hide
Let's go further still
Than we've ever gone
Let's go far beyond
What we've ever known
