

The Crows Are Coming For Us

From First To Last

How does it feel to be ashamed of who you love?

Oh, I know, you wore me out so proudly

Hidden in the glitter is the real thing, real

Always knew

What you were

Always knew

You walk on water, you sing a lovely tune

You walk on water, you sing a lovely tune

You walk on water, you sing a lovely tune

You walk on water, you sing, sing

Always knew

What you were

Always knew

The crows are coming for us

Let them live, let them live

The crows are coming for us

Let them live, let them live

The crows are coming for us

Let them live, let them live

The crows are coming for us

Let them live, let them live

The crows are coming for us

Let them live, let them live

The crows are coming for us

Let them live, let them live

The crows are hungry for us

Let them live, let them live

The crows are hungry for us

Let them live, let them live

The crows are hungry for us

Let them live, let them live

The crows are hungry for us

Let them live, let them live

Always knew

What you were

Always knew

What you were

(The crows are coming for us)

Always knew

(The crows are hungry for us)

What you were

(The crows are coming for us)
