

Conventional Wisdom

Built To Spill

Sometimes life surprises
'Cause you never expected to be that
Dangerous disguises
That you never expect to see
Some things never change
Nothing's gonna change that
Some things you can't explain
Like why were all embracing conventional wisdom
In a world that's just so unconventional
Made you turn around
But you never expected to see that
That's what makes that sound

That you never expect to hear
Some things never change
Something's gotta change that
Some things you can't explain
Like why were all embracing conventional wisdom
In a world that's just so unconventional
They don't know they're wrong
But you know that they never can see that
That's what makes them strong
That they know that we'll never see
