

Star Machine

Jebediah

Been thinking of building a ship to the stars
Jesus she says I know what you mean
Found plans made in fourth grade should get me that far
Above this experience
I need to find a way today for far away
I'll make you then take you my flying machine
I'm over exposure
For the trouble that we're in
I need to levitate
There's a simple explanation
Don't be scared just prepared
The shed light on all night
The belief in relief found somewhere to hide
The work noise outside
Jesus she says I know what you mean
My flying machine
Pre ChorusChorus
Chorus
MeanderI've set the date take off's tonight
My star machine takes flight
