John Wayne

Thomas Dybdahl

Don't dream what others do, don't tell me you're in dreaming too
'Cause shit ain't always how you planned it, how you planned to break on trough
That ain't you

Life takes a different turn, it may feel like your average crash & burn
'Cause shit ain't always how you planned it, how you planned to break on trough
And it ain't always how you'd live your life if you could live your life again

In time you'll find someone a way to better yourself, a plan to break on through
And in time you'll find someone to guide you through, a guidance that'll do

The man says it's gonna be all right
'Cause day by day it gets better (in time)
Yes it's gonna be all right
'Cause day by day it gets better (in time)
Day by day leave your worries behind
Take the word of someone loving you

It's all in place
Don't dream what others do, don't tell me you're in dreaming too
'Cause shit ain't always how you planned it, how you planned to break on trough
That ain't you

In time you'll find someone a way to better yourself, a plan to break on through
And in time you'll find someone to guide you through, a guidance that'll do
And you'll find it's exactly how you'd live your life if you could live your life again
'Cause you found a friend
