

Baby behave, we'll make it work  
You're only what you give back  
You're only what you give back  
You're only what you give back  
You're only what you give back  
You're only what you give back  
Stop this right away  
Put that down and clean this mess up  
End of conversation  
Put your back in it and make it up to me now  
Stop this right away  
Put that down and clean this mess up  
End of conversation  
Put your back in it and make it up to me now  
Are you with me? Are you with me?  
You're only what you give back  
You're only what you give back  
You're only what you give back  
You're only what you give back  
You're only what you give back
