

# Before You

## Carousel

It's all the same  
Take me out and give me all the way  
I better give up now  
Just run away  
I can't say I'm not always this way  
I better give up now And I was better then, I was better before you  
And I was better then, I was better before you And after the morning  
I can find ways to keep you off my mind  
But it's not good for me  
And there's the next one, the next one  
But they don't kiss me like you do  
The next one, the next one  
But they're not it And I was better then, I was better before you  
And I was better then, I was better before you And there's the next one  
But they don't kiss me like you do  
The next one  
But they're not it And I was better then, I was better before you  
And I was better then, I was better before you  
And I was better then, I was better before you  
And I was better then, I was better before you
