

Love and Communication

Cat Power

Love & communication you were here for me
At this very moment 'cuz I found you on the phone you called me
And you were not hunting me Learning more and more about less and less and less
On the edge of your seat in some dark movie
Can you memorize the scenes, they'll be different next week Can you tell me, can you tell, can you tell
If there is something better
'Cuz you know there always is, always is Drawn to the party like a spider filling up your guts
Don't hate the night, what you shouldn't have
Come along for the ride, you just know you should
You just know you should Can you tell me, can you tell, can you tell
If there is something better
'Cuz you know there always is, there always is Hated to see you sad when I left
There's just no good in that but the good part was
That I came at all 'cuz I don't venture out Into the lives of the new
I want you to come along for the ride
How long will you stay for your whole life
You just know you should Can you tell me, can you tell, can you tell
If there is something better
'Cuz you know there always is, always is Love & communication you were here for me
At this very moment 'cuz I found you on the phone you called me
And you were not hunting me Can you tell me, can you tell
If there is something better
Can you tell me, can you tell
If there is something better
