

# New Day

## Figure Four

I'd been locked down for years  
I'd been locked, locked down  
    In a cage for years  
    Didn't know what free meant  
    Couldn't find the key  
    Massed off for guilt as pitting for myself  
        Where did that get me?  
        It got me not too far  
        I remember times I had  
        Didn't know myself  
    Or the one who set me free  
        The one who had the key  
    I could barely make out the face  
        That put life in this shell  
        I remember times I had  
        The days without my faith  
    All the answers that I thought were lost  
    Brought before my eyes when I asked  
        Answers when I ask  
        They lift me up  
        Answers I received  
        And you won't let my fall  
        Don't let me fall down
