In State

Kathleen Edwards

I can spot your kind a million miles away
Buckle down boots and a bloodshot gaze
You talk so sweet until the going gets tough

The last job you pulled was never big enoughDon't say you'll change after the next time You wouldn't even be yourself if you weren't telling a lieAnd I know where the cops hang out

> I know where you'll be found I know what you're all about

I know when you're going downYou only call me honey when we're alone Hiding at your place up on slack road

You've got an answer for every little thing

You can't even tell me where you've beenMy face couldn't make you leave it behind Maybe 20 years in state will change your mind'Cause I know where the cops hang out

> I know where you'll be found I know what you're all about

I know when you're going downAnd don't say you'll change after the next time You wouldn't even be yourself if you weren't telling a lie

Maybe 20 years in state will change your mind'Cause I know where the cops hang out

I know where you'll be found I know what you're all about

I know you'll never change nowI know my love was good enough
I know you would have shed my blood
I know you can't shut me up

I know when you're going down
