You Know What

Avant

I, I got something to tell ya, girl
I got something that I wanna do
I, I got something to tell ya
I wanna, you know what, you know what
I been looking for you for a long, damn time
But you been gone away, I nearly lost my mind
Now, we're in the club and you're grindin' on me
Touchin' on me, got me goin' crazy
That skirt you wearin' got a playa on swolle
As I glance at my watch and see the night is growin' old
I start to reminisce about when we were shorties
Back seat of my jeep, yes, I'm feelin' horny
As I play my position posted up on the wall
Happy to hear the DJ say, last call
'Cause what that means is we about to leave
And I'm about to be all up on you and you up on me
'Cause I want you and in the middle of the night, I'm gonna rub
And if you let me go down, I'm gonna taste
And when it's all said and done, I'm gonna
You know what, you know what
'Cause I want you and in the middle of the night, I'm gonna rub
And if you let me go down, I'm gonna taste
And when it's all said and done, I'm gonna
You know what, you know what
It's hard to keep in touch while you're off in school
But now you're right here we can do what we do
Start in the car and end up in the livin' room
Kiss around your navel while you're on the end table
Pushed the magazines down on the floor
I'm your soldier, so, I'm ready to go to war
And you told me you're hot and you're ready
Ya legs won't stop shakin', just give it to me, daddy
And I like the way your body's lookin' right there
Knowin' we might not even make it upstairs
And what that means is just relax your mind
And baby, let it flow, it's goin' down and that's for sho'
'Cause I want you and in the middle of the night, I'm gonna rub
And if you let me go down, I'm gonna taste
And when it's all said and done, I'm gonna

You know what, you know what
'Cause I want you and in the middle of the night, I'm gonna rub
And if you let me go down, I'm gonna taste
And when it's all said and done, I'm gonna
You know what, you know what
Yeah, fresh off the G.fo need no intro, weezy baby, nympho
Him, so gentle with it, still got mami limbo
Little bitty put his thang down like matumbo
Young dude, rich, smart, humble
Got something down, low to make your walls crumble
Not rough though, slow mo, promo, we could go video
Uh, uh, true doe, that's right
Nasty, that's all in me, how he rappin' got women like he R and B
What you know about your legs in the air, with your head in the chair
With my hands in your hair, we could go there
If what I'm sayin' sounds fair
Don't trip, I kiss every lip, don't flip, flip up the doors
On the out of country whip
I could take you out of this world, baby, let's dip
'Cause I want you and in the middle of the night, I'm gonna rub
And if you let me go down, I'm gonna taste
And when it's all said and done, I'm gonna
You know what, you know what
'Cause I want you and in the middle of the night, I'm gonna rub
And if you let me go down, I'm gonna taste
And when it's all said and done, I'm gonna
You know what, you know what
