

# I Saw Stars

## Reed Waddle

Sun sets across the ocean  
like a fire in the sky  
the silhouette is set  
leaving candy for your eyes..

I listen to the ocean  
The voice of the sea  
Put it all together, piece by piece

The Sun Went down  
The Moon rose up  
I went to the bar  
I lift my cup  
When I got home  
I just looked up..  
And I saw Stars

I drove in from Savannah,  
The Georgia state line  
Where the blood flows like the water  
And the women they're just like time  
They'll hold you for the seasons  
The warm summer nights

Where if loving you is wrong.. I don't want to be right...

She holds me down  
Wrinkles my shirt  
lets her hair down  
she makes me hurt  
I touch her face  
and I kiss her mouth  
And I saw stars..

I saw stars..

Feeling so incredibly small,  
Like a grain of salt tossed into the sea  
And the wonder of it all-

Is we just don't know how bright we all may be.

things that I remember  
things that don't make sense  
getting knocked down by the riptide,  
but I ain't drowned yet..

I want to ride the big time, ride that train...

Count the stars.

You took your time,  
At your own expense  
You fought your wars  
You made amends  
It all went down

And it just made sense  
When I saw Stars..

I saw stars
