

# Never the Less

## Par~a~digm

Never The Less(Verse)

Hold truth to the letter

For worse or for better

I cannot forsake you

There's some things that I can't do All we have in common

Is forgiven and forgotten

Everything will be okay

Oh learn to watch and pray

(Chorus)

Don't worry, I won't be empty

I won't let you slip away

I've already, been through the fire and now the rain

No nevertheless, never the less

Bending and breaking, that can maintain

Cause I've never been perfect, but you've never been here alone(Verse)

It's never easy, to be inferior

Hold on forever, hold on for the better

Don't you get nervous, don't lose your purpose

I'm not the same way, I won't run away Don't worry, I won't be empty

I won't let you slip away

I've already, been through the fire and now the rain

No nevertheless, never the less

Bending and breaking, that can maintain

Cause I've never been perfect, but you've never been here alone

Have you ever had to break my fall, at all?

I won't let you slip away.....Been through the fire and now the rain

No nevertheless, never the less

Bending and breaking, I can maintain

Cause I've never been perfect, but you've never been here alone Before you say we'll fade away

I won't let you slip away.....
