The Perfect Virus

Annihilator

Creeping through the system
Spreading like a disease
A cancer like affliction
To bring us down to our kneesCreated for the masses
Systematic crash and burn
To pillage and to plunder
This cyber hungry worldCirculate, devastate
Recreate the perfect virus
Circulate, devastate
Recreate the perfect virusEntering the mainframe
Like a rogue, killing, hunting machine
Weaving it's web of destruction
Like nothing before ever seenArtificial intelligence
Wiping it all as it learns
Crucial data corruption
The chips are down and they burnCirculate, devastate
Recreate the perfect virus
Circulate, devastate
Recreate the perfect virusI will deploy and terminate
I will expand and annihilate
You will scramble to vaccinate
You will find out that it's too late
I will deploy and terminate
I will expand and annihilate
You will scramble to vaccinate
You will find out that it's too late
Too lateAah picking up the pieces
In the aftermath of the war
A technological genocide
The likes never seen beforeSeeking restitution
As the world comes crashing down and
The creator of this Trojan horse
Has vanished, never foundCirculate, devastate
Recreate the perfect virus
Circulate, devastate
Recreate the perfect virusCirculate, devastate
Recreate the perfect virus
Circulate, devastate
Recreate the perfect virus

Virus
