

# Endless

**Dave Gahan**

In the cold of the full moon on this night  
Time itself it slips away, now you are mine  
Slowly hours pass all through the night  
Together we can disappear for a while Now I am still forever and ever and ever  
Now I am still forever and ever and ever  
Endless, endless, now I am still  
Endless, endless, your body is endless Watching the hourglass on that night  
We touched the stars  
And reached the moon for a time  
I'm lost in a moment with you, it feels right  
We're floating above the stars, you and I Now I am still forever and ever and ever  
Now I am still forever and ever and ever  
Endless, endless, now I am still  
Endless, endless, your body is endless I am still forever and ever and ever  
Now I am still forever and ever and ever  
Endless, endless, now I am still  
Endless, endless, your body is endless I am still, now I am still  
Now I am still, now I am still
