

Nothing to Say

Paul Baribeau

To spend some time and share a look?" There was no thinking twice
The die was cast no time to lose as much as one can say
Didn't hesitate to call you back and things were under way
And if it wasn't for the circumstance and well against all odds
Well that's enough for feeling great, the best we could have got
And just in case there's something wrong so much with you to share
Much better anyways than watch or stroll 'round everywhere

Nothing to say

We got it there

A long, long way

Right in our hands

Nothing to say

Now we can use all we give

All of our loving and affection

We'll have our way like we always do

Nothing to say

Now we can use all we give

All of our loving and affection

We'll have our way like we always do

You called me up the other day just when I thought you would

And asked if we could break apart as things ain't been too good

I swallowed hard and got that feel, I know it's called unease

The confidence I've kept so well, just came down piece by piece

That's all it takes, it's sad but done, no way to disagree

Time takes toll and that's the way it's always gonna be

'Cos it wasn't yet the circumstance but more than just a test

There's little left for feeling great and all I need's some rest

There's not a single glimpse of hope, well, someone took my place

It's yet another turn for me, I'll be messin' 'round everywhere

Nothing to say

We got it there

A long, long way

Thereof our hands

Nothing to say

So you refuse all I give

All of my loving and affection

I'll make my way like I always do

Nothing to say

So you refuse all I give

All of my loving and affection
I'll make my way like I always do
So you refuse all I give
All of my loving and affection, oh, oh
So you refuse all I give
All of my loving and affection, oh, oh, oh
Nothing to say
So you refuse all I give
All of my loving and affection
I'll make my way like I always do
Nothing to say
So you refuse all I give
All of my loving and affection
I'll make my way like I always do, oh, oh, oh
I got, I got nothing to say
I got nothing, nothing to say
I got way, I still brave horizon
Nothing to spill
Oh, long, long way
Nothing to say, oh
