

She's Leaving Me Because She Really Wants To

[Lyle Lovett](#)

Thank you my friend
I sincerely appreciate the words you say
About how she'll cry
And how she'll grieve and miss me when she goes away
Say them again
I need to hear the words once more I can't believe
How she'll miss me when she's gone
And how she'll want to come back home and never leave
But she's leaving me because she really wants to
And she'll be happy when she's gone
She'll be happy she'll be so very happy
She'll dance and sing or even learn to fly
And spend her time with anyone but me
What's that you say
That I'll get over her the more that time goes by
But time goes so slow
When all I have to do is sit around and cry
No she won't be back
I'd be a fool to try to fool myself that way
I know she hasn't one regret
Because she hasn't had one since the day she came to stay
She's leaving me because she really wants to
And she'll be happy when she's gone
She'll be happy she'll be so very happy
She'll dance and sing and even learn to fly
And spend her time with anyone but me
She'll be happy when she's gone
And she'll be happy when she's gone
She'll be happy when she's gone
And she'll be happy when she's gone
