

Perfect Weather

Gabriel Bruce

Everything
I promise you everything
And I'll give you all I can give
And stand by your sideThe sunlight hits
The smile that's upon your lips
As you walk your fingertips
Down the staircase of my spineWe couldn't hope for more perfect weather (x4)
If we tried
To find
A more pleasant climeEverything
I promise you everything
Just swallow your medicine
And you'll be all rightHow could I know
You'd decline and turn to go?
See you're dressed up as diamonds, but
Darling really you're coldAnd we'll burn without the shade
And the light refuses to fade
You say: 'let's wait for winter'
But we've had perfect weather
For so long that I've been praying for rainWe couldn't hope for more perfect weather (x5)
If we tried to find
A more pleasant clime
