Along for the Ride

River City High

Youe shifting gears again
Youe changing lanes
I looking for street names
But theye all the same
Wee headed for dead ends
And one way streets
So Il just sit back
And let things beYoue falling asleep at the wheel
Youe fading fast
Youe swerving out of your lane
I think wee gonna crash
Wee headed for twisted metal
Wee headed for broken glass
I think from where I sitting
Il have to watch it pass(chorus)
I in the back seat
I watching you drive
Il take the back seat
Along for the ride
I in the back seat
I watching you drive
Il take the back seat
On this long, long rideAnd I see right now
Wee headed nowhere fast
Shoulde known when you drive like that
Youe gonna finish last
I leaving, I stealing
I hitching a ride
There only one way out of here
And no one gets out alive
(Chorus)
(Chorus)
