European Girl

Citizens!

European Girl
Take off your coat
European Girl
I still want your soulDon't be scared of the world
The world outside your windowI'll take your picture, and later of you're free
I'll drink your coffee, flick through your TV
See the smoke fill up your streets from your balcony
Every night you wonder why the galleries have hung you out to dry?European Girl
Take off your coat
Don't be scared of the world
The world outside your window
No matter how, no matter how you work it out
No matter how far you have to fly
You'll be on my mind
I will be dreaming of a European GirlIf I might be so bold
Take your time, I'll take off your coat
I beg your pardon, we're moving the wheels
It's hard to be the children of someone else's revolution
Better world harder and harder, then
You're going to make it for a thousand years
European Girl
I won't be going anywhere, European Girl(She don't need no chaperone, no she don't need no god)
