

Together

Paul Mccartney

Together we can make it happen

Together we can make it stick

Together we can make it happen

(Together)

Together we can make it stick

(Together we can make it happen, together)

I learn something special, special every day

I learn something special every day

(Together we can make it happen, together)

Learn something hard, learn something fast

And I learn to find my way

Together we can make it happen

Together we can make it stick
