

Face In The Moon

Springtime Carnivore

You're standing there
Brushing the comets out of your hair
Are you coming back to Earth for a little while? You think that love
Always rises out of your reach
It's a cold and distant thing you can barely see
Calling to the dark
Is anybody out there?
Is anybody out there?
That's when I fall apart
I'm the one right here
I'm the one right here
Oh, I hope you see it soon
Are you gonna find that face in the moon? You don't like it easy
No, no you don't like sure
I press my hands to the glass of the revolving door
All your pain
You're spinning like a weathervane
And you know I would be the end of your storm
Calling to the dark
Is anybody out there?
Is anybody out there?
That's when I fall apart
I'm the one right here
I'm the one right here
Oh, I hope you see it soon
Are you gonna find that face in the moon?
Calling to the dark
Now you're calling to the dark
Are you gonna see that face in the moon?
Are you gonna see that face in the moon?
