

Someday

Intergalactic Lovers

Sleep now my love
Though I'm not coming home
Don't you worry about the places
I might choose to love In time you will forgive me
For what I put you through
In time you will be thankful
For the love I gave to you Ooh, ooh
Bless the giants golden heart
Ooh, ooh
Raise it all down fallen stars Someday we will dance again
Like we did when we were lovers
And in time we will laugh about
All the ways we hurt each other Hush now my love
There's no need to waste those tears
Don't you focus on the bad, think
Of all those joyful years In time you will see me
For what I really am
In time you might choose to
Hold my hands again Ooh, ooh
Bless the giants golden heart
Ooh, ooh
Raise it all down fallen stars Someday we will dance again
Like we did when we were lovers
In time we will laugh about
All the ways we hurt each other And someday you might
Choose to love me back
And someday you might
Be able to And someday you might
Choose to love me back
And someday you might
Be able to forgive
