

The Ghost Behind You

Astorian Stigmata

Hail to the queen
Cause that;s what the queen just said
And there will be lots of peace on earth
After we're all dead

She bought a vegan cook book
In a city full of smog and Aids
And her little sisters calling
From the South of Spain

"Love others like yourself"
That's what Jesus said
And there will be lots of peace on Earth
After we're all dead
She got a Bible from a Pastor
In a town full of Drunks
She hears her little brother calling
Saying:
"Stay away from him"

LaLaLaLaLaLaLaLaLaLa

To feel alright is to fucking die
And cancer is the man falling from the sky
You know why I am not a liar
Skeletons on my steps at Midnight

Taste of blood in my mouth
Ain't nothing but a day dreamers house
His Black heart is beating
And his soul is on fire
You better lock the doors
Tonight
