

Year of Decision

The Three Degrees

Yes this is the year
To make your decision
You gotta get it together
Yes this is the year
To open up your mind If you've been holding back kind of slack, yeah
Now's the time to get the things you need
There ain't no reason why you should be shy
People have died to set you free Oh we need every one to succeed
Everybody to succeed, we need everybody
We're just like soul isn't enough
Hey come on and join us please
Come on, come on and join us please Yes this is the year, come on
To make your decision
You gotta get it together
Yes this is the year, come on
To open up your mind If you're strong out on a Jones, yeah
You better make sure that you leave the bad stuff alone
Whatever you wanna do think it over good
'Cause the choice is up to you Oh we need every one to succeed
Everybody to succeed, we need everybody
We're just like soul isn't enough
Hey come on and join us please
Come on, come on and join us please Yes this is the year, come on
To make your decision
You gotta get it together
Yes this is the year, come on
To open up your mind Yes this is the year, come on
To make your decision
You gotta get it together
Yes this is the year, come on
To open up your mind
Open up, open up your mind Yes this is the year, come on
To make your decision
You gotta get it together
Yes this is the year, come on
To open up your mind
Open up, open up your mind
