We Found a Place

Beverley Craven

There has to be a reason for this life
I hope we keep a light
To guide the way
The voices in your heart will shine a light
To set your spirit free
And learn to fly
We found a place
Just you and i
A time for friends
Another life
A chance for dreams
Or just something else
But most of all
To find myselfI understand so little of this life
The only thing I know
Is how I feel
But you were there when I was all alone
It means so much to me
I'll always knowWe found a place
Just you and i
A time for friends
Another life
A chance for dreams
Or just something else
But most of all
To find myselfA chance for dreams
Or just something else
But most of all
To find myself
But most of all
To find myself
