

The Way I Love You

Tamia

She can't do what I do to you
I know she can't love you
The way I love you
Right here looking in your eyes
Thinking about what we did last night
And how you suddenly blew my mind
Your touch to your tender kiss
Couldn't take you breathing in my ear
Just being with you made me realize
And every time I see you, baby, I fall in love over again
So proud that you are my man
And I still can't, can't get you outta my head
You're all I've ever wanted and you just gotta know that
She can't do the things I do to you
No one is loving you the way, the way I love you
She can't be everything you need and what you need is me
'Cause it's the way I love you
The way that I love you
Love you the way I do
The way, the way
The way I love you
When you smile, my mind goes spare
Can't imagine live without you here
Someway somehow you've completed me
Thank God you came my way
What we have came to replace
You make it easy to be in love
And every time I see you, baby, I fall in love over again
So proud that you are my man
And I still can't, can't get you outta my head

You're all I've ever wanted and you just gotta know that
She can't do the things I do to you
No one is loving you the way, the way I love you
She can't be everything you need and what you need is me
'Cause it's the way I love you
The way that I love you
Love you the way I do
The way, the way

The way I love you
Don't waste your time, baby
And you know that you're mine, baby
She can't satisfy the way that I do
'Cause she can't love you like I do
She can't do the things I do to you
No one is loving you the way, the way I love you
She can't be everything you need and what you need is me
'Cause it's the way I love you
She can't do the things I do to you
No one is loving you the way, the way I love you
She can't be everything you need and what you need is me
'Cause it's the way I love you
The way that I love you
Love you the way I do
The way, the way
The way I love you
The way that I love you
Love you the way I do
The way, the way
The way I love you
