

# Unlikely (Stay With Me)

[Celldweller](#)

sick of this mind and the games it plays  
mental enemies want to push me back again  
here they come running wanting me up on that  
tree crucified (wait a minute) whatever words they say (me who said it)  
whomever they betray (me who did it)  
whenever they're awake it makes me die there's so much on my mind  
we're given so little time  
there's no way to hold on as it passes by  
so lead me into denial  
help me forget for awhile stay with me, please don't go  
don't want to, be alone  
stay with me, please
