

# Lovestruck

## Vertical Horizon

Here we are under stars  
And their light is falling down like carols  
Crack the skies you and I  
Til the night just opens up and lets go Lovestruck lovestruck you leave me lovestruck  
Lovestruck lovestruck you leave me  
Don't leave me love Dim the sound underground  
In mute calico and golden sunlight  
Feel the break it's all it takes  
Got a favorite thing, a favorite way to lie Lovestruck lovestruck you leave me lovestruck  
Lovestruck lovestruck you leave me  
Don't leave me love  
Lovestruck lovestruck you leave me lovestruck  
Lovestruck lovestruck you leave me  
Don't leave me love Lovestruck (you've got me lovestruck now)  
Lovestruck (ooh love)  
Love  
Lovestruck The trees will guard the sun will guard the ground  
Like the breezes blowing from another town  
I guarantee the eyes are all darkened now  
We lie down we lie down  
We go back and forward to evermore  
We never needed something that we needed more  
The sweet release is all that we believe in now  
We lie down we lie down Lovestruck lovestruck you leave me lovestruck  
Lovestruck lovestruck you leave me  
Don't leave me love  
Lovestruck lovestruck you leave me lovestruck  
Lovestruck lovestruck you leave me  
Don't leave me love
